SMOKE PRODUCTS
50 Year 2009

Product News. FP-Smoke™

For the last few years Smoke Manufacturer BJÖRNAX AB in Sweden has been working on a new and Eco-friendly way to dispense a non-toxic smoke and dispensing system that provides a realistic, lighter than air smoke, December 2007 we patented the FP-Smoke Technology (Floating Powder Smoke).

FP-SMOKE Applications.

In General:

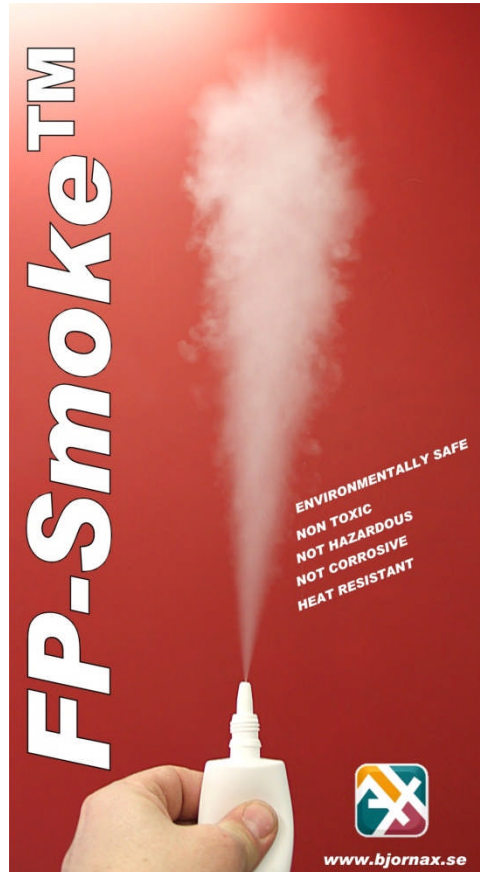

Energy Saving Tests
Duct Testing
Draft Testing
Leak detection
Safety Specialists
Negative Pressure Rooms
Positive Pressure Rooms
Stage and Screen Effects
Photographic Effects
Air Balancing Professionals
Air Filtration Testing
Dust Removal Systems
Fire and Smoke Alarm Tests
Poultry and Livestock
K-9 Training
Electronic Air Filters
Asbestos Abatement
Radon Abatement
Risk Management Spec.
Waste Treatment Systems

Leak Detection:

Cargo Trailers
Cargo Containers
Recreational Vehicles
Ventilation Systems
Tanks and Piping

Flow Tests:

Gas installations
Exhaust ventilations
Kitchen Hoods
Heat Exchangers
Fume Hoods
Exhaust Fans

Usage is for the air balancing industry, the energy conservation industry, smoke and fire prevention, special effects, and anywhere you need just the right amount of test smoke. Our soon to be released FP-Smoke is precisely as described. FP-Smoke provides a smoke that looks and reacts just as our successful smoke emitters, in a reliable and simple dispensing system.

Unlike our smoke emitters, FP-Smoke requires no ignition source or flame to initiate the smoke. The first released dispensing system are a easy To use squeeze bottle.

This bottle can be provided with a proven heavy duty hand pump allowing a progressive quantity of non-toxic smoke delivered as needed for the task.

A small squeeze provides enough smoke for draft detection or negative pressure around a door, multiple pumps can provide up to 4 m³ (140 ft³) or more of realistic smoke, depending on packaging.
